SUMMARY

Full-Stack Web Developer and recent graduate of Uplift Code Camp (Batch 26 – MERN Stack). Experienced in building scalable web applications using **Laravel**, **React**, **Node.js**, **Express**, **MongoDB** and **MySQL**. Passionate about developing secure authentication systems, creating responsive user interfaces, and continuously learning modern web technologies to deliver high-quality digital solutions.

EXPERIENCE

Department of Science and Technology | Computer Operator III (IT Support & System Development) | 01/2025 – Current

- Assisted in the **customization and enhancement of internal systems**, contributing to automation and improved workflows.
- Collaborated with colleagues to **troubleshoot software issues**, reducing downtime and streamlining IT support requests.

Taguig City University | Web Developer | 1/1/2023 – 12/31/2024

- Developed internal web applications** using **Laravel (Blade)** and **React.js**, accelerating module delivery and improving user experience.
- Designed optimized MySQL schemas** for student, faculty, and course data, ensuring fast queries and reliable performance.
- Implemented role-based authentication** with **Laravel Auth**, enhancing security and access control across 3 distinct user groups
- Created middleware** for route protection, session validation, and permission checks reducing unauthorized access and simplifying route logic.
- Built responsive UIs with Blade + React.js**, improving mobile usability and reducing bug reports by 30%.

Taguig City University | IT Support | 2018-2022: Provided IT support and gained a strong technical foundation before transitioning into web development.

EDUCATION

Uplift Code Camp | *Full stack web Development (MERN)* | May - Oct 2025

Taguig City University | Bachelor of Science in *Computer Science* | 2013 – 2017

PROJECTS

Online Job Portal – *Laravel, React, MySQL*

Role: **Full-Stack Developer**

- Built a job posting platform for partner companies, enabling employer registration, job management, and applicant tracking.
- Improved student-employer matching with a role-based interface and streamlined application process.

Admission and Room Assignment System – *React, Laravel, MySQL*

Role: **Full-Stack Developer**

- Developed an online admission system for student registration and manual exam room allocation.
- Reduced staff workload by digitizing applicant data management and room assignments.

Employee & Faculty Attendance System - *Laravel, PHP, JavaScript, jQuery, AJAX, MySQL*

Role: **Full-Stack Developer** • Created a web-based attendance system with secure authentication, clock-in/out tracking, and auto-generated reports.

- Improved HR monitoring accuracy and reduced manual errors in time records.

Faculty Evaluation System - *PHP, JavaScript, jQuery, AJAX, MySQL*

Role: **Full-Stack Developer**

- Digitized manual faculty evaluations with secure logins, dynamic survey forms, and automated reporting.
- Cut administrative processing time by 70% and increased evaluation participation rates.

SKILLS

- Frontend:** JavaScript, HTML, CSS, React.js, Tailwind
- Backend:** PHP, Laravel, NodeJS, Express JS
- Databases:** MySQL, MariaDB, MongoDB
- Tools:** Git, GitHub, Postman, VS Code, XAMPP. Pusher
